Eric Ariel De La Paz

Product Designer · Design Systems Architecture & AI-Accelerated Prototyping

Texas, U.S.A. | (832) 758-4781 | ericforall247@gmail.com | **Portfolio** | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Systems-minded Product Designer passionate about scalable token-based Figma design systems, WCAG accessibility, and AI-accelerated product engineering. Experienced in architecting zero-to-one component libraries and directing AI coding workflows (Claude, Gemini, GitHub Copilot) through staged change lists to ship production web and desktop tools. B.S. in UX Design (WGU, Nov 2026).

WORK EXPERIENCE

Product Design Intern | ***Stealth Startup*** — **Jul 2026 – Present** · *Remote*

- **Zero-to-One System Architecture:** Architected a token-based Figma design system from scratch across two mobile apps and a desktop dashboard, unifying variables and component standards across a ~5-person design team reporting directly to the founder.
- **AI-Enhanced & Conditional Prototyping:** Built interactive prototypes with nested component states, dynamic overlays, typeable inputs, and conditional logic, cutting stakeholder demo setup and run time by 30+ minutes per session.
- **Cross-Platform Feature Delivery:** Designed and shipped ~30 responsive screens and modal workflows from concept to developer handoff, collaborating closely with the founder and engineering leads under NDA.
- **Design Ops & Mentorship:** Mentored 2–3 design interns per session, led design critiques, and ran monthly Figma workshops on responsive Auto Layout and variable-driven interactive prototypes.

UI/UX Design Intern | ***Flyrank AI*** — **Jul 2026 – Nov 2026** · *Remote*

- **Design Systems Architecture:** Built a centralized Figma token-based design system (variables, 4-color semantic palette, typography scale) with every style bound to shared tokens, eliminating manual per-screen visual rework and accelerating global UI updates.
- **User Research & Discovery:** Synthesized 10+ competitive audits and customer return-rate data into a fit-confirmation checkpoint for men's luxury formalwear rental, resolving recurring fit-uncertainty blockers prior to checkout.
- **Component Library & Handoff:** Designed multi-state UI patterns in Figma using component variants (dropdowns, bottom sheets, tabbed selectors, collapsible navigation) and documented interaction specs for engineering handoff.
- **UI Element Consolidation:** Cut interface element count by over half under tight timelines by consolidating redundant components and styles, tying every removal directly to core user flows.
- **Information Architecture:** Developed a 7-section IA and three annotated user flows (primary booking, onboarding, and sizing recovery with specialist escalation).

FEATURED PRODUCT DESIGN PROJECTS

Mambo Database — Design Systems & Accessibility Resource Hub *[Design Systems · WCAG Accessibility · AI Tooling · Live Website]*

- Architected and built a resource website and utility suite for designers to generate token-driven design systems, run WCAG AA/AAA accessibility checks, and guide AI workflows in producing tailored, accessible UI foundations.

Study Buddy — Desktop Focus Companion *[Figma · Electron · React · TypeScript · AI-Assisted Build]*

- Designed a desktop focus companion in Figma and shipped Windows, macOS, and Linux installers by directing Gemini through staged change lists across 40+ commits. Dogfooded daily to refine break overlays and WCAG AA contrast.

SecureID — Identity Verification & Analyst Review Platform *[Figma · Design Tokens · SaaS Dashboard · Clickable Prototype]*

- Designed a dual-sided product—an end-user mobile verification flow and desktop analyst triage dashboard—on 1 shared token system, streamlining case triage into 3 primary actions (Reject, Escalate, Approve) via progressive disclosure.

EDUCATION & CREDENTIALS

Western Governors University — Bachelor of Science in User Experience Design — **Dec 2025 – Present**

Coursera — Google UX Design Professional Certificate — **Jan 2026 – Present**

TECHNICAL SKILLS

Design & Systems: Figma (Auto Layout 5.0, Variables, Design Tokens, Component Variants), Design Systems Architecture, Responsive Design (Web/Mobile), Design QA, Engineering Handoff, WCAG 2.1 AA/AAA Accessibility, Style Guides.

UX Process & Research: Information Architecture, User Flows, Journey Mapping, Wireframing, Rapid Prototyping, Usability Testing, Heuristic Evaluation, Cognitive Walkthroughs, Competitive Analysis, Dogfooding.

AI Workflows & Code Literacy: Claude, Gemini, GitHub Copilot, Granola AI, Staged AI Prompting, HTML/CSS, React, TypeScript, Electron, Git/GitHub, VS Code, FigJam.
