Eric Ariel De La Paz

Junior Product Designer · Design Systems, Interaction Design & Prototyping

Texas, U.S.A. | (832) 758-4781 | ericforall247@gmail.com | **Portfolio** | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Systems-minded Junior Product Designer with two concurrent internships building token-based Figma design systems, high-fidelity interactive prototypes, and engineering handoffs across web, mobile, and desktop products. Bridges UX strategy with engineering reality by directing AI tools (Claude, Gemini, GitHub Copilot) through staged change lists to prototype and ship working software. B.S. in UX Design (WGU, expected Nov 2026).

WORK EXPERIENCE

Product Design Intern | ***Stealth Startup*** — **Jul 2026 – Present** · *Remote*

- **End-to-End System Creation:** Led creation of a token-based Figma design system from scratch across two mobile apps and a desktop dashboard as one of ~5 design interns reporting directly to the founder.
- **High-Fidelity Prototyping:** Built interactive prototypes with complex component states, dynamic overlays, typeable fields, and conditional logic, cutting prototype demo setup and run time by 30+ minutes per session.
- **Feature Delivery:** Delivered ~30 new and refined responsive screens and modal overlays, collaborating closely with the founder, engineering leads, and cross-functional interns (performed under NDA).
- **Mentorship & Leadership:** Mentored 2–3 design interns per session, conducted design critiques, and led monthly Figma workshops on responsive Auto Layout and variables in interactive prototypes.

UI/UX Design Intern | ***Flyrank AI*** — **Jul 2026 – Nov 2026** · *Remote*

- **Design Systems Architecture:** Built a centralized Figma token-based design system (variables, 4-color semantic palette, typography scale) with every style linked to shared tokens, eliminating manual per-screen visual rework and accelerating global UI updates.
- **User Research & Discovery:** Synthesized 10+ competitive audits and customer return-rate data into a fit-confirmation checkpoint for men's luxury formalwear rental, directly addressing recurring fit-uncertainty blockers prior to checkout.
- **Component Library & Handoff:** Designed multi-state UI patterns in Figma using component variants (dropdowns, bottom sheets, tabbed selectors, collapsible navigation) and documented interaction behavior for engineering handoff.
- **UI Element Consolidation:** Cut the interface element count by over half under tight timelines by consolidating redundant components and styles, tying each component removal directly to core user flows.
- **Information Architecture:** Developed a comprehensive 7-section IA and three annotated user flows (primary booking, onboarding, and sizing recovery with specialist escalation).

FEATURED PRODUCT DESIGN PROJECTS

Study Buddy — Desktop Focus Companion *[Figma · Electron · React · TypeScript · AI-Assisted Build]*

- Designed a desktop focus companion in Figma and built working Windows, macOS, and Linux installers by directing Gemini through staged change lists across 40+ commits. Dogfooded daily to stress-test break overlays, distraction nudges, and WCAG AA contrast compliance.

SecureID — Identity Verification & Analyst Review Platform *[Figma · Design Tokens · SaaS Dashboard · Clickable Prototype]*

- Designed a dual-sided product: an end-user mobile verification flow and a desktop analyst triage dashboard on 1 shared token system. Streamlined analyst case triage into 3 primary actions (Reject, Escalate, Approve) with progressive disclosure overlays.

Honda of Clear Lake — Dealership Website Usability Audit *[Nielsen 10 Heuristics · Usability Analysis · Severity Ranking]*

- Audited a live dealership site against Nielsen's 10 heuristics, categorizing 31 usability violations on a 0–4 severity scale and authoring an actionable engineering punch list for 3 catastrophic conversion blockers.

EDUCATION & CREDENTIALS

Western Governors University — Bachelor of Science in User Experience Design — **Expected Nov 2026**

Coursera — Google UX Design Professional Certificate — **Expected Nov 2026**

TECHNICAL SKILLS

Design & Systems: Figma (Auto Layout 5.0, Variables, Design Tokens, Component Variants), Responsive Design (Web/Mobile), Design Systems Architecture, Design QA, Engineering Handoff, WCAG 2.1 AA Accessibility, Style Guides.

UX Process & Research: Information Architecture, User Flows, Journey Mapping, Wireframing, Rapid Prototyping, Usability Testing, Heuristic Evaluation, Cognitive Walkthroughs, Competitive Analysis, Dogfooding.

Tools & Code Literacy: Figma, FigJam, HTML/CSS, React, TypeScript, Git/GitHub, Claude, Gemini, GitHub Copilot, Granola AI, VS Code.
