Eric Ariel De La Paz

Product Designer · Design Systems, Interaction Design & Prototyping

Texas (Open to Remote) | (832) 758-4781 | ericforall247@gmail.com | **Portfolio** | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Systems-minded Product Designer with two concurrent internships building token-based Figma design systems, interactive prototypes, and engineering handoffs across web, mobile, and desktop products. Bridges UX strategy with engineering reality by directing AI tools (Claude, Gemini, GitHub Copilot) through staged change lists to build and ship working software. B.S. in UX Design (WGU, expected Nov 2026).

WORK EXPERIENCE

UI/UX Design Intern | ***Flyrank AI*** **Jul 2026 – Present** · *Remote*

- **Design Systems Architecture:** Built a centralized Figma token system (variables, 4-color semantic palette, type scale) linking styles to shared tokens, eliminating per-screen visual rework across mobile and web.
- **User Research & Discovery:** Synthesized 10+ competitive audits and return-rate data into a pre-checkout fit-confirmation checkpoint for luxury formalwear (Vextaro), resolving primary customer sizing anxiety.
- **Accessibility & Design QA:** Audited 15 checks against WCAG 2.2 AA at the token level, resolving critical text contrast failures (4.29:1 → 8.31:1) and enforcing minimum touch target sizes across viewports.
- **Engineering Handoff & Redlines:** Documented 35 component variants, annotated redlines, and 146 interactive prototype connections for developer handoff; consolidated redundant elements by 50%+ to streamline core booking flows.

Product Design Intern | ***Stealth Startup*** **Jul 2026 – Present** · *Remote*

- **End-to-End System Creation:** Led creation of a token-based Figma design system from scratch across 2 mobile apps and desktop dashboard as 1 of ~5 design interns reporting directly to the founder.
- **High-Fidelity Prototyping:** Built complex interactive prototypes with conditional logic, dynamic overlays, and typeable fields, cutting demo setup and walkthrough time by 30+ minutes per founder session.
- **Feature Delivery & Collaboration:** Designed and handed off ~30 responsive screens and modal overlays, collaborating closely with founder and engineering leads under tight release sprints (under NDA).
- **Mentorship & Leadership:** Mentored 2–3 design interns per session, conducted design critiques, and led monthly Figma workshops on Auto Layout 5.0 and variables in interactive prototypes.

FEATURED PRODUCT DESIGN PROJECTS

Study Buddy — Desktop Focus Companion [Figma · Electron · React · TypeScript · AI-Assisted Build]

- Designed a floating desktop overlay in Figma and shipped working cross-platform installers (Windows, macOS, Linux) by directing AI through staged commits across 40+ commits (~14 hrs active build time); dogfooded daily for WCAG AA compliance.

SecureID — Identity Verification & Analyst Review Platform [Figma · Tokens · SaaS Dashboard · Clickable Prototype]

- Designed an end-user mobile verification journey and high-throughput desktop analyst triage dashboard on 1 shared token system; streamlined triage into 3 primary actions (Approve, Escalate, Reject) with progressive disclosure.

Honda of Clear Lake — Dealership Website Usability Audit [Nielsen Heuristics · Usability Analysis · Severity Ranking]

- Audited a live dealership site against Nielsen's 10 heuristics, identifying 31 usability violations across core conversion paths and authoring an actionable engineering punch list for 3 critical blockers.

EDUCATION & CREDENTIALS

Western Governors University — Bachelor of Science in User Experience Design **Expected Nov 2026**

Coursera — Google UX Design Professional Certificate **Expected Nov 2026**

TECHNICAL SKILLS

Design & Systems: Figma (Auto Layout 5.0, Variables, Design Tokens, Component Variants), Responsive Design (Web/Mobile), Design Systems Architecture, Design QA, Engineering Handoff, WCAG 2.2 AA Accessibility, Style Guides.
UX Process & Research: Information Architecture, User Flows, Journey Mapping, Wireframing, Rapid Prototyping, Usability Testing, Heuristic Evaluation, Cognitive Walkthroughs, Competitive Analysis, Dogfooding.
Tools & Code Literacy: Figma, FigJam, HTML/CSS, React, TypeScript, Git/GitHub, Claude, Gemini, GitHub Copilot, Granola AI, VS Code.
